

For Immediate Release

Chicago (June 5, 2013) – nuHaus announces the grand opening of its Chicago showroom at 120 W. Hubbard St., in the heart of the River North design district. The 5,000-square-foot showroom and design studio is poised to be Chicago’s preeminent kitchen and fine cabinetry resource to the design industry and end-user alike.

nuHaus is nationally renowned for their custom kitchen design, cabinetry, millwork and incomparable kitchen architecture. Their name – and design philosophy – derives from the world famous design school, Bauhaus. The new nuHaus showroom exemplifies the company’s seamless merging of aesthetics and function, as well as limitless customization possibilities and unequalled execution.

At the heart of nuHaus’ objective is their dedication to design integrity from concept to construction, an end-to-end approach furthered through their ownership of Exclusive Woodworking, Inc. and dealer representation of Downsvie Kitchens, both manufacturers of fine cabinetry and millwork. nuHaus co-owners and brothers, Doug and John Durbin, created their dream headquarters with the aim of expertly and equally serving designers, architects, builders and homeowners.

“We believe that this is an exciting time to set deeper roots in the center of Chicago’s esteemed design community. The goal of the new showroom is to demonstrate the full range of our capabilities, cater to the needs of our clients and design partners and ensure greater convenience and complete satisfaction,” says Doug Durbin. “Along the way we hope to advance and celebrate the practice of fine cabinetry and kitchen design and share the passion and enthusiasm we bring to all our projects.”

The new showroom presents five distinct, well-appointed vignettes that appeal to a range of tastes and styles. Durbin and his team at nuHaus recognize that great design imparts beauty, meaningful solutions and, ultimately, enjoyment. Each nuHaus project is tailored to meet the exacting needs of the end-user and every detail is considered. This guiding principle distinguishes nuHaus in the market and is evident in every facet of the showroom.

The showroom is a masterful and harmonious mix of cabinetry, furnishings, architectural elements and technology and is a testament to how nuHaus excels at thoughtful design through aesthetically advanced and precisely constructed spaces. Subtle yet impactful details – a nuHaus hallmark -- are evident throughout the new space.

In addition the showroom will feature exclusive new products, including the North American showroom debut of the Scanomat TopBrewer. TopBrewer is a revolutionary coffee delivery system that dispenses fresh, barista-style coffee in 15 seconds -- from espresso to macchiato to double lattes – via its sculpturally styled tap. Designed to be built into any tabletop or counter and controlled by an iPad or iPhone, nuHaus is the first showroom in the U.S. to offer the innovative coffee machine.

nuHaus is located at 120 W. Hubbard St., adjacent to Hydrology, a distinctive destination for high-end kitchen and bath fixtures and other exclusive water-centric collections. Previously based in Highland Park on Chicago's North Shore, nuHaus' 5,000-square-foot showroom and design studio will serve as the company's new headquarters location.

About nuHaus

Masters of kitchen architecture, nuHaus has designed, constructed and installed fine cabinetry and architectural millwork to wide acclaim for 25 years. Family-owned-and-operated, nuHaus was launched by brothers Doug and John Durbin in 1988. The name nuHaus is derived from the world famous design school, Bauhaus. The Bauhaus approach celebrates the harmony between art and function; nuHaus believes that art and function are intended not only to complement but also inspire one another. This simple but profound principle informs and shapes the award-winning work of the Durbins and their team of kitchen designers as they deliver complex custom designs to their industry partners and discerning clientele. nuHaus is an exclusive dealer of Downsview Kitchens from Canada, and also offers LaCornue ranges from France, the Scanomat TopBrewer from Denmark and Exclusive Woodworking, their own fine cabinetry and millwork manufacturing company. Notable nuHaus projects include the Sub-Zero/Wolf showroom in Buckhead outside of Atlanta, Georgia, the Sub-Zero/Wolf showroom in Chicago's Merchandise Mart, and The Links House at Royal Dornoch, in Dornoch, Scotland. nuHaus has won a record eight Sub-Zero/Wolf design contests and now Doug Durbin serves as a judge of the prestigious competition.

The nuHaus showroom and design studio is located at 120 W. Hubbard St. in Chicago's River North area. Please visit www.nuhaus.com for more information.
